Nanoplasty, perfected.

BRAZILIAN INNOVATION

Nanoplasty, perfected.

A salon-grade, formaldehyde-free straightening system — in **Gel** and **Blond** formulas — that hydrates, repairs and seals in a glassy, long-lasting finish.

- **Formaldehyde free**
- **Blond & bond safe**
- **Straightens 100%**
- **Long-lasting result**

Professional use.

THE SYSTEM

Your Products

Everything you need for the complete Nanoplasty treatment — **Gel** for all hair types and **Blond** for blonde & highlighted hair.

Deep Cleansing Shampoo

500 ML

Silk Professional Gel

1 L

Blond Nanoplasty

1 KG

Heat Protectant

200 ML

Silk Rescue

MASK

Glossy Hair Mist

400 ML

EXTRA TIP · POROUS HAIR

Rescue Pre-Treatment

For very porous, fragile or over-processed hair, prep with **Silk Rescue** before starting the Nanoplasty to deeply reconstruct the strand.

1 Wash

Wash the hair with **Silk Professional Deep Cleansing Shampoo**.

2 Apply & massage

Apply **Silk Rescue** mask strand by strand and massage for **5 minutes**.

3 Rest & rinse

Leave to rest a further **5 minutes** (10 minutes total). Make sure to rinse out the **Silk Rescue** mask completely.

SILK RESCUE

Then go straight into the Nanoplasty steps — **no need to wash the hair again.**

Instructions for Use

NANOPLASTY · STEPS 1–3

SILK PROFESSIONAL

1 Preparation

Wash the hair with **Silk Professional Deep Cleansing Shampoo** to remove impurities and buildup. Rinse thoroughly and dry 100% with a blow dryer.

2 Apply Nanoplasty

Divide the hair into 4 sections. Apply **Silk Professional Nanoplasty** — **Gel** for all hair, or **Blond** for blonde & highlighted hair — strand by strand, keeping a distance of **5 mm** from the scalp. Leave on for **60 minutes**.

3 Rinse

Rinse thoroughly to remove 100% of the product, then gently towel dry. Spray **Silk Professional Heat Protectant** evenly throughout the hair.

SHAMPOO

GEL

BLOND

HEAT PROTECT.

Did the **Rescue Pre-Treatment**? Skip the wash in Step 1 and begin with fully dried hair.

Instructions for Use

NANOPLASTY · STEPS 4–5

SILK PROFESSIONAL

4 Drying & Sealing

Blow dry the hair until completely dry. Straighten in fine sections (approximately **0.5 cm**) passing a professional **titanium flat iron**.

The number of passes, time & temperature will vary depending on each client's hair — see the temperature chart that follows.

HEAT PROTECTANT

5 Finishing

Finish as desired. For a salon-perfect reveal, follow the **Rescue & Glossy Finish** on the next page.

Always seal with a **professional titanium flat iron** for the best, longest-lasting result.

SILK PROFESSIONAL

Rescue & Glossy Finish

A beautiful post-treatment to reveal the final result to your client.

1

Rescue mask

Rinse the hair, then apply **Silk Rescue** mask. Leave for **5 minutes** and rinse off.

2

Blast dry

Blast dry the hair until smooth and completely dry.

3

Glossy Hair Mist

Finish with **Silk Professional Glossy Hair Mist** for extra shine and a luxurious, long-lasting fragrance.

Key Factors Before Flat Ironing

Before deciding on temperature and passes, evaluate the hair carefully:

- **Texture:** straight, wavy, curly
- **Thickness:** fine, medium, coarse
- **Chemical History:**
  - Virgin / healthy
  - Coloured / bleached healthy
  - Bleached damaged
- **Strength & Elasticity:** how resistant or fragile the hair feels

Step by Step · Silk Professional Nanoplasty

SILK PROFESSIONAL

Number of Passes & Temperature by Hair Type

NANOPLASTY · GEL & BLOND

Straight

12 / 15 passes

F° C°

450°/230° healthy, virgin, thick hair
410°/210° healthy bleached hair
340°/170° sensitive bleached hair

Wavy

15 / 18 passes

F° C°

480°/250° healthy, virgin, thick hair
450°/210° healthy thin or coloured thin hair
340°/170° sensitive bleached hair

Curly / Coarse

18 / 23 passes

F° C°

480°/250° healthy, virgin thick hair
450°/230° healthy, virgin thin hair
410°/210° bleached hair

Coily / Afro

20 / 25 passes

F° C°

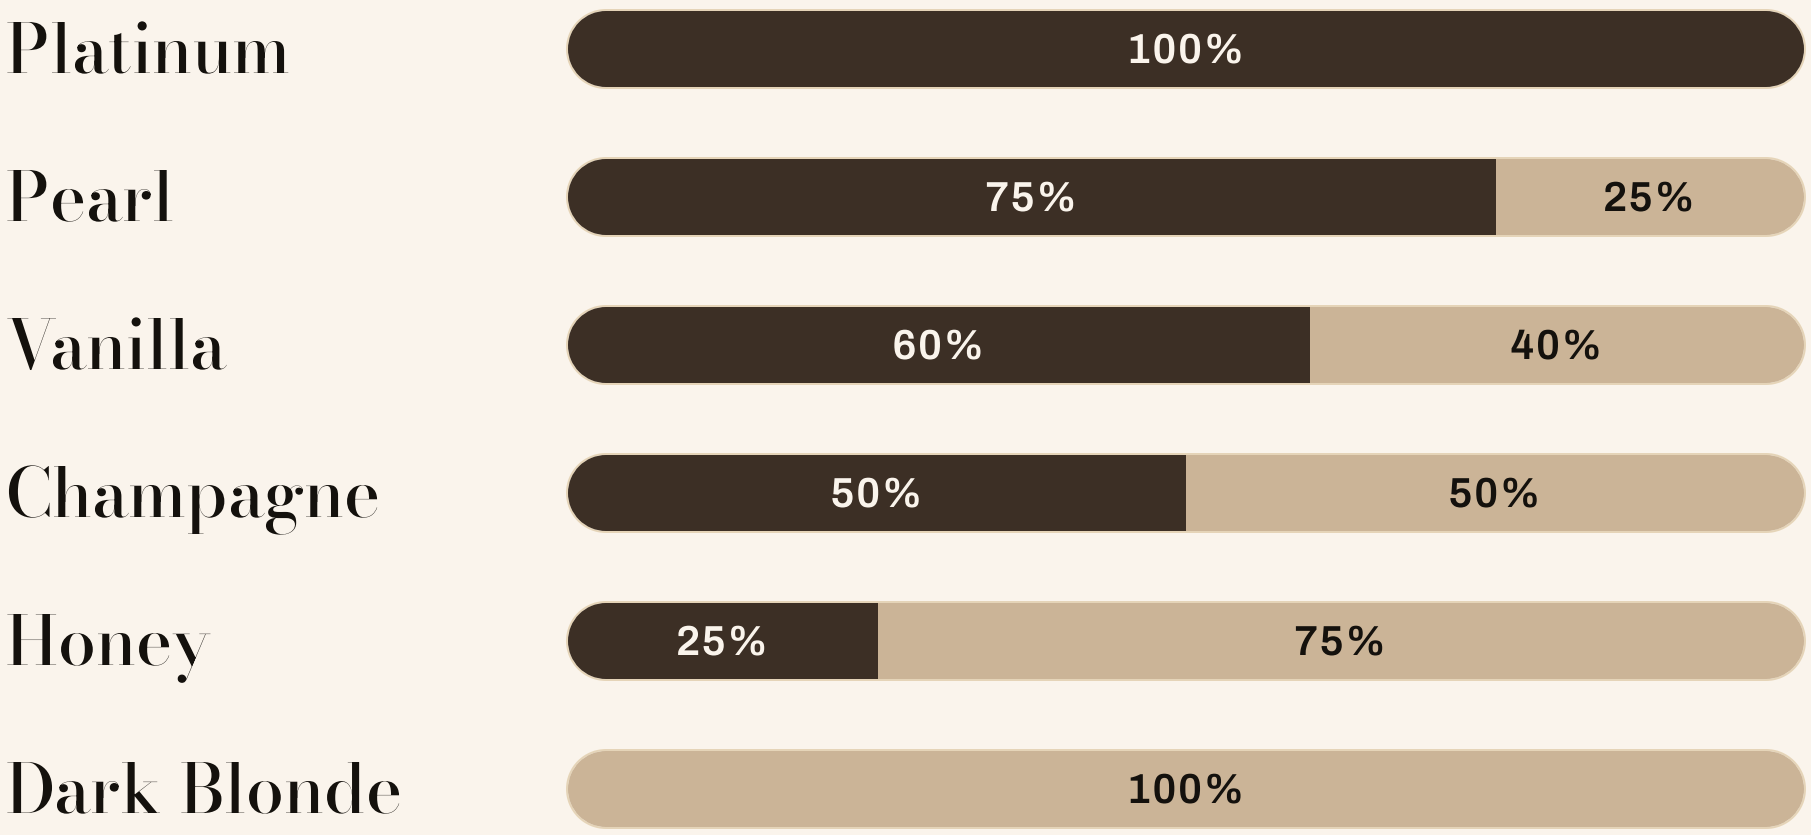

480°/250° healthy, virgin thick hair
450°/230° healthy, virgin thin hair
410°/210° bleached hair

Use 250°C only for very coarse & resistant hair

SILK PROFESSIONAL

Blond & Gel Mixing Guide

SELECT BY BLONDE SHADE

Select the mixing ratio according to the client's current blonde shade. **The lighter and cooler the blonde, the higher the proportion of Silk Blond required.**

These ratios are a guide, not an exact science — an approximate mix works perfectly. No need to overcomplicate it.

SILK
PROFESSIONAL

Nanoplasty *tips*

- Always use a **titanium professional flat iron** for best results.
- Clients can wash their hair immediately after the Nanoplasty treatment.
- Clients can tint their hair immediately after the treatment.
- Clients can bleach their hair, either up to two weeks before or after Nanoplasty.
- For bleached or blonde hair, use **Blond Nanoplasty** or a toning mask after the treatment to maintain colour.

THE RESULT

Glassy, weightless, salon-perfect.

Thank you!
